Preface

The Family Planning and menopause Unit has supported learning of medical students, residents and research including services which are continuously growing. Teaching staff and support staff, their names listed in this annual report, efficiently collaborate so that the Unit is able to respond to excessive need of clients and thus producing high outputs

Statistical records are important basis for medical students and teaching staff for inquiry, planning teaching, service and research. This annual report is then hopefully essential and highly useful for everyone to share the use of data.

This annual report shows data from the Family Planning Clinic, Menopause Clinic. Although nowadays most patients decide contraceptive methods by themselves, there are still significant demands for contraception consultation to the clinic. There are also a growing number of patients with menopausal symptoms. Therefore, the clinic serves as an important resource for health service providing, counseling, teaching and training.

PART II

Menopause Clinic

MENOPAUSE CLINIC

: Annual report 2020

Definition:

Number of service time: Frequency of service or treatment of menopausal women

New cases: The women who visit to menopausal clinic for the first time.

Ongoing cases: The women who visit for follow up or ongoing service at menopause clinic.
Individual may visit more than one time.

Natural Menopause: including

- **Pre-menopause:** Women age > 40 years who have menopausal symptoms and irregular menstruation or absence of menstruation not longer than 3 months.
- **Peri-menopause:** Women age > 40 years who have menopausal symptoms and irregular menstruation or absence of menstruation for 3–11 months.
- **Post-menopause:** Women age > 40 years who have menopause as a result of natural ovarian atrophy and absence of menstruation over 1 year.

Surgical menopause: Women who have bilateral ovaries and/or uterus removed by surgery

Premature menopause: Women age < 40 years who have menstruation absence and clinical diagnosis as premature menopause from all causes such as premature ovarian failure, Systemic Lupus Erythrematosus (SLE), Parathyroid disease, Thyrotoxicosis or others.

Menopausal service during the year 2020:

Number of new cases (first visit)	182 cases
Number of ongoing (follow up) cases	2,021 cases
Total cases of service	2,203 cases
Total frequent of service time	5,813 times

Table 1. Menopausal service of new and ongoing cases (N=2,203)

Cases	Number (case)	percent
New (first visiting in menopause clinic)	182	8.3
Ongoing cases (continued year 2019)	2,021	91.7
Total	2,203	100.0

New case: Mean age 53.3 ± 7.9 years, Age Range 33–82 years

Total case: Mean age 51.7 ± 6.6 years, Age Range 18– 82 years

Present age: Mean age 61.4 ± 8.3 years, Age Range 18– 89 years

Figure 2.3 Age groups of new menopausal women of year 2018 to 2020

Table 7. Age of new menopausal women categorized by menopausal period

Menopausal period	Number (n=182)	Age range (Min–Max)	Mean Age (Mean \pm SD)
Pre-menopause	13	49–57	52.5 \pm 3.3
Peri-menopause	43	33–56	48.4 \pm 4.6
Post-menopause	97	39–82	56.3 \pm 7.2
Surgical menopause	24	36–68	50.9 \pm 7.5
Premature menopause	3	33–39	35.7 \pm 3.0
Normal / Check up	2	38–58	48.0 \pm 14.1

Note : Age was present at first visit

Table 8. Frequency of clinical service for each women per year

Frequency visit/ year	Number cases	Percent
1	406	18.5
2	647	29.4
3	648	29.4
4	374	17.0
5	102	4.6
6	25	1.1
7	1	0.04
Total	2,203	100.0

Range (min – max) = 1–7 visits/year/case

Mean \pm SD = 2.6 \pm 1.1 visits/ year/ case

Definition of menopausal symptoms:

Classic symptoms : such as: Hot flush, hot flash, sweating, sleeping difficulty, sleep disturbance

Uro-genital symptoms : such as: frequent urination, urge urination, coughing or sneezing urinary incontinence, urinary burning, vaginal dryness or burning, dyspareunia, decreasing or loss of libido

Musculo-skeletal symptoms : such as: musculo-skeletal ache, myalgia, waist/back/leg myalgia

Atrophic symptoms : such as: dry skin, dry hair, dry eye, irritation/ itching skin.

Psychological symptoms : such as: tiredness, lack of energy, mood change, sensitive, depression, fear of public, anxiety.

Climacteric symptoms : such as: more than one menopausal categories as above and other associated menopausal symptoms

No symptom : No menopausal symptoms, routine physical check up, health care needed

Table 9. Menopausal service categorized by menopausal symptoms

Symptoms	Number(visit) (N=5,813)	Percent	Number(case) (N=2,203)	Percent
Climacteric symptoms	60	1.0	60	2.7
Classic symptoms	155	2.7	140	6.3
Uro-genital symptoms	181	3.1	160	7.2
Musculo-skeletal symptoms	120	2.1	119	5.4
Atrophic symptoms	109	1.9	104	4.7
Psychological symptoms	216	3.7	203	9.2
No symptom/ Improvement	4,698 /2	80.8/ 0.03	2,020 / 2	91.6/ 0.1

Note : Menopausal symptoms in individual may be more than one.

Table 10. Menopausal symptoms categorized by complaints in new cases

Symptoms	Number (N=182)	Percent
Climacteric symptoms	54	29.7
Classic symptoms	61	33.5
Uro-genital symptoms	59	32.4
Musculo-skeletal symptoms	46	25.3
Atrophic symptoms	60	33.0
Psychological symptoms	80	44.0
No symptom	21	11.5
Others	0	0

Note : Menopausal symptoms in individual may be more than one.
